Available for full-time employment: January 2027

CAREER OBJECTIVE

Software Engineer Intern at Smartship Technology (SkyBiz), where I built and deployed live multi-channel e-commerce integrations (Shopify, Lazada, TikTok Shop) for a production ERP system, covering product listing, inventory sync, order management, and fulfillment workflows, with WooCommerce integration in progress. Implemented OAuth 2.0 authentication and resolved real sync issues across active client stores. Information Technology undergraduate at Universiti Kebangsaan Malaysia (UKM); coursework complete and available to commit full-time from January 2027.

EDUCATION

Bachelor of Information Technology (Honours) - CGPA : 3.70
Universiti Kebangsaan Malaysia (UKM) - Expected Graduation: August 2027

- Currently in 4th Year
- Relevant Coursework: Programming, Database Systems, Networking, Software Development, Web Technologies

Matriculation Certificate (Science Stream) - CGPA : 3.84
Kolej Matrikulasi Negeri Sembilan (KMNS) - Completed: 2022/2023

- Focus: Mathematics, Physics, Chemistry, Biology

SKILLS

- **Programming Languages:** Python, PHP, JavaScript, VB.NET, Kotlin, HTML/CSS
- **Frameworks & Libraries:** Bootstrap, jQuery, RESTful API, JSON, MVC Framework, Laravel, React, Next.js, OAuth 2.0
- **Database:** MySQL, Microsoft Access (OleDb), PDO

- **Development Tools & IDEs:** Visual Studio, Android Studio, Unity, Sublime Text, XAMPP/Apache, FileZilla, Git/GitHub
- **Platforms & Technologies:** Web Development, Android App Development, Virtual Reality (VR), Windows Forms Application, E-commerce Platform Integration (Shopify, Lazada, Shopee, TikTok Shop, WooCommerce)
- **Operating Systems:** Windows, Linux (Ubuntu) - basic server administration & command-line operations
- **Data & Analytics:** Data Analysis, Machine Learning, Statistical Modeling, Data Visualization (Google Advanced Data Analytics - Coursera)
- **Productivity Tools:** Microsoft Office (Word, Excel, PowerPoint, Access), Google Workspace
- **Soft Skills:** Communication, Collaboration, Problem-Solving, Time Management, Adaptability, Fast Learner

PROJECTS

Auditrix: AI-Powered Audit Lifecycle Platform
Company NTT Data - September 2026

- Developed a web-based audit platform concept and working prototype for NTT Data's IT service management audit challenge, in a team of two.
- Independently designed and built the interactive front-end prototype of seven pages (Dashboard, Ticket Detail, Scoring Rubric, Real-Time Monitor, Consistency Analytics, Audit History, Legacy Process) using HTML5, CSS3, and vanilla JavaScript, with inline SVG charts.
- Designed a weighted scoring rubric for four ITSM ticket types (Incident, Change Request, Service Request, Problem), with an 80-point auto-flag threshold and Critical criteria that force human review when they fail.
- Implemented a human-in-the-loop review flow in which auditors agree with or override an AI flag, with a mandatory override reason, plus a 4-hour escalation rule that reroutes unacknowledged flags to the least-loaded auditor.
- Grounded the design in research, including NTT Data's published ITSM ticket types, ITIL change types (including Emergency Change handling), and Continuous Auditing practice.
- Built analytics views separating proven baseline figures from clearly labelled pilot projections to keep assumptions transparent.
- Presented the solution in pitch sessions to the Kabel programme team and iteratively improved the prototype and slides based on their feedback.
- Deployed the prototype to GitHub Pages.

Excel Quick Reference - Personal Project
https://mithra05-omg.github.io/excel-guide/ - October 2026

- Tech: HTML, CSS, JavaScript, GitHub Pages
- Designed and deployed a searchable web reference for Microsoft Excel with 892 entries (functions, shortcuts, formula recipes and troubleshooting fixes), tagged by category, level and usage frequency.

- Implemented instant client-side search with keyword matching and ranking, so problem descriptions like "not adding" surface the right fix.
- Developed interactive examples rendered in the browser from the entry data: colour-coded mini spreadsheets, shortcut keycaps and before/after error views.
- Delivered a responsive, framework-free site with dark mode, copy buttons and a printable cheat sheet, with all content in a single data file for easy maintenance.

TRACKED - Secondary School Attendance Management Portal (Final Year Project) Universiti Kebangsaan Malaysia (UKM) - 2025/2026

- Independently developed a full-stack web-based attendance management portal for secondary schools, supporting three user roles: Admin, Teacher, and Parent.
- Built the frontend using HTML5, CSS3, and JavaScript, and the backend using PHP with MySQL (MariaDB) database managed via Apache (XAMPP).
- Implemented secure database connectivity using PDO (PHP Data Objects) with prepared statements to prevent SQL injection.
- Designed features allowing teachers to record and monitor student attendance, with parents able to view their child's attendance in real time.
- Developed an Excel export function enabling teachers to download complete class attendance records in one place.
- Conducted user testing with real users and iteratively improved the portal based on feedback from a supervisor demo session.
- Deployed the portal to the university server using FileZilla FTP client.

Web Programming Portfolio - TP2543 Web Programming Universiti Kebangsaan Malaysia (UKM) - 2025

- Developed a full-stack personal portfolio website showcasing weekly lab exercises and assignments across 12 weeks.
- Applied a range of technologies including HTML, CSS, PHP, MySQL, JavaScript, Bootstrap, jQuery, and RESTful API.
- Built dynamic web features such as a guestbook system, biodata form, MVC framework implementation, and a Single Page Application (SPA) using JSON.
- Deployed live on the UKM LRGS server: http://lrgs.ftsm.ukm.my/users/a202499/

FitWarrior Shop Management System - Visual Basic .NET Desktop Application Universiti Kebangsaan Malaysia (UKM) - 2025

- Developed a Windows desktop application to manage a fitness equipment shop, covering products, staff, customers, and orders.
- Implemented full CRUD (Create, Read, Update, Delete) operations for all entities using VB.NET and Microsoft Access database via OleDb.
- Built an order and invoicing system with cart functionality, real-time subtotal calculation, and transaction management.
- Designed an interactive product catalog with image display, dynamic search, and multi-form navigation.

MyPeace - Mental Health & Wellness Android App Universiti Kebangsaan Malaysia (UKM) - 2025

- Developed an Android mobile application focused on mental health support, featuring breathing exercises, personal journaling, an AI chatbot, and a one-tap emergency hotline.
- Built using Kotlin and Android Studio with XML-based UI layouts and multi-activity navigation.
- Implemented a splash screen, intent-based activity routing, and emergency call functionality using Android's telephony API.

AWARDS

Dean's List

Universiti Kebangsaan Malaysia (UKM) - *Semester 3, 4, 5 & 6*

- Achieved outstanding academic performance with a GPA of **3.84 (Sem 3)**, **3.75 (Sem 4), 3.89 (Sem 5)** and **3.89 (Sem 6)**

Google Advanced Data Analytics Capstone Certificate

Coursera (by Google)

- Applied data analytics and machine learning techniques to real-world datasets, including data exploration, statistical analysis, predictive modeling, and visualization.

Red Hat System Administration I (RH124) Certificate - April 2026

- Completed 40 credit hours of Red Hat System Administration I (RH124 - RHA) Ver. 10, covering Linux system administration fundamentals

Red Hat System Administration II (RH134) Certificate - May 2026

- Completed 40 credit hours covering advanced Linux system administration

EXPERIENCE

Software Engineer Intern | Smartship Technology Sdn Bhd (SkyBiz)
10 *August 2026 – Present (ending 28 December 2026)*

- Built and deployed live multi-channel e-commerce integrations (Shopify, Lazada, TikTok Shop) for a production ERP system, with WooCommerce integration in progress
- Developed core modules covering product listing, inventory sync, order management, and fulfillment workflows
- Designed and restructured a unified database schema to support multi-channel product and order data across platforms
- Built a cross-platform bulk product-copy feature with automated validation, enabling transfer of thousands of products between sales channels
- Implemented OAuth 2.0 authentication flows for secure third-party API access across multiple platforms

- Resolved production sync issues across live client stores, ensuring accurate inventory and order data across channels

Front-End & Backend Developer | Freelance Website Developer
10 *September 2026 - Present*

Content Creator - IT Education | TikTok
Jan 2024 – Present

- Produce and share educational content related to information technology, web development, and digital tools.
- Apply video production, social media strategy, and technical expertise to promote IT learning online.

EXTRACURRICULAR ACTIVITY

Timbalan Ketua Projek 1 (Deputy Project Director) - *Varnam Night 3.0*
Kelab Sentamil Kalagam, Kolej Pendeta Za'ba (KPZ), Universiti Kebangsaan Malaysia (UKM) - 2024

- Assisted in planning and managing *Varnam Night 3.0*, a cultural event celebrating Tamil arts and performance.
- Coordinated committees, managed event logistics, and supported the project director in decision-making.
- Strengthened leadership, teamwork, and event management skills.

EXCO PROGRAM - Minggu Cabaran Digital: Cyber Awareness CTF Faculty of Information Science and Technology (FTSM), Universiti Kebangsaan Malaysia (UKM) - May 2024

- Served as an Executive Committee (EXCO) member in organising a 3-day cybersecurity awareness event open to universities, colleges, and schools nationwide.
- Event covered key cybersecurity topics including Cryptography, Steganography, Reverse Engineering, Web Exploitation, and OSINT.
- Contributed to event coordination, logistics, and participant engagement for a Capture The Flag (CTF) competition.

EXCO Member - Hari Interaksi BSMM DET88L KPZ 2024/25 Bulan Sabit Merah Malaysia (BSMM), Kolej Pendeta Za'ba (KPZ), Universiti Kebangsaan Malaysia (UKM) - October 2024

- Served as an Executive Committee (EXCO) member in organising a community interaction programme focused on health awareness and organ donation advocacy ("Jom Derma Organ").
- Coordinated event logistics including VIP reception, programme flow, and participant activities for a half-day formal event held at Grand Hall KPZ.
- Strengthened organisational, teamwork, and event management skills in a community service setting.
